Goodfield Highlights

ALL RESIDENTIAL WATER USERS....PLEASE FILL OUT THE CROSS CONNECTION SURVEY ATTACHED TO THIS NEWSLETTER AND MAIL IT BACK AS SOON AS POSSIBLE !!

State of Illinois regulations require the Village of Goodfield Water Department to implement an active cross-connection control program. A cross-connection is any situation that allows potable (safe) water source and a non-potable (contaminated) water source the opportunity to come into contact with each other. A cross-connection between potable and non-potable water sources may cause anything from contamination of plumbing, to sickness, and even death in consumers.

The first step in implementing an approved program is the passage of a cross connection control ordinance that is then submitted for approval by the Illinois Environmental Protection Agency (IEPA). Our ordinance has been approved by the IEPA.

The second step in the program is conducting periodic surveys of all of our water customers. **Enclosed is a survey that we hope you will complete and return to the Village Hall as soon as possible.** Simply mark all plumbing fixtures that you have in your home or business. If you have other fixtures that are not listed, please mark in the "other" spaces. The implementation of our ordinance is reviewed by the IEPA.

After we receive your survey, we will review the information and determine if an inspection of your plumbing is needed. If an inspection is necessary, you will be notified by mail.

These surveys are required by ordinance and must be completed. If the Village does not receive your completed survey, you will be contacted for a date at which time Water Department personnel will conduct the survey.
