

# *Village of Goodfield*

## STREETS AND ALLEYS COMMITTEE MEETING September 27, 2017

Meeting was called to order at 3:00p.m. by Streets & Alleys Chairman Terry Nohl. The following were present: Committee member Jim Edwards. Also present were Engineer Duane Yockey, Public Works Administrator Nohl and Assistant PWA Mike Carr.

The agenda for the meeting was to discuss the 5–10 year capital improvements plan.

Public Works Administrator handed out previous capital projects list to build off of.

### **Water Main Looping**

Timberline Road/Barn III loop  
Dead end main by Vermeer – tie it in under Rte. 117 where it goes to Deer Lakes  
Rte. 150 – connect Rte. 150 out to CNH & 117 to Schrocks  
Timberline Road to Rte. 117 – no need to do this unless something develops  
Replace all asbestos cement water mains in town which are mostly 4” mains  
Connect across Rte. 117 from Business Park to Scott Leman’s  
Parkside and Gail Street are dead ends that need to be looped  
Grimm Road is a long dead end  
Loop main by Hoerr Construction back to Martin Drive

The goal is to loop the water mains. If you close the loops you get better flow and less stagnant water. Some loops need to wait for future development to happen.

### **Sanitary Sewer**

Trunk sewer needs to be upgraded.  
The Village will need easements to get to the trunk sewer. We need to consider the monetary cost for these easements. This process should begin in the near future.

Phase II sewers – Robinson Street – 30’ in ground in the middle of the street. The Village could put in a pumping station. Trunk sewer needs to be done first.

SE Commercial Development would include sanitary sewer and lift station.

### **Streets**

Timberline culvert and raising the road  
Widen & overlay E Martin Road  
Overlay Grimm Road  
Overlay corner that goes through Timberline by the campground. This could be done when we put in the culvert  
Overlay Seal Coat the N/South Martin Rd around curve going to Oak Valley Subdivision  
End of Scenic Drive at Bridle Ridge dead end where it was supposed to connect to  
Parkside needs a gravel cul-de-sac.  
Gail Street also needs a gravel cul-de-sac

### **Storm Sewer**

Should think about putting a certain amount of money in the budge each year for cleaning, camera and lining. Current areas of concern Cleveland St and E Robinson St. back by railroad.

### **Building**

If the Barn III comes to reality and Abby Reel gets the liquor license then there will be other businesses that will also want liquor. It would also bring more new businesses to Goodfield. Will we need our own Police Department? This is something to consider for the future.

Need storage area to store resin.

### **Sidewalks**

Eventually, 5 foot sidewalks at the park.

West side of Grimm Road

Rte. 117 sidewalks

### **Park**

Update playground equipment.

Engineer Yockey will put together a prioritized list of future infrastructure with budgetary cost for the next Board Meeting.

Motion was made by Edwards, seconded by Nohl to adjourn meeting. Meeting adjourned at 4:28p.m.

Respectfully submitted,

Terry Nohl  
Streets and Alleys Committee Chairman
